

CandyWorx

Experts in Confectionery, Chocolate, & Cannabis

Engineering Solutions

As a brand of Spec Engineering, CandyWorx offers a complete solution to its customers by pairing the expertise in process design and engineering along with quality custom confectionery equipment. With a combined manufacturing facility in Plainfield, IL, our systems are fabricated and assembled in the USA.

FRONT-END LOADING

Identify risks, problems, and scope to explore the feasibility of your project and build your business case for your capital investment. Determine project scope, calculate ROI, gain expert advice, and more to begin your CAPEX projects with more confidence.

AUTOMATION & CONTROLS

Automating your process and equipment can help lower labor costs, increase food safety and repeatability, all while driving down cost per piece. We also offer control system programming, recipe blending systems, instrumentation specifications, panel design and fabrication, and engineering.

COMPLETE SYSTEMS

Modular skid systems can fast track project schedules, minimize time to market, as well as reduce installation and commissioning time. Save up to 25% compared to build-on-site systems, with higher quality, greater reliability, and single source accountability.

PRODUCT DEVELOPMENT

This service offers CandyWorx customers the flexibility to expand, test, and prove concepts, without disrupting their current production. Toll processing or contract manufacturing is also offered.

THE COMPLETE SOLUTION

As a brand of Spec Engineering, CandyWorx offers a complete solution to its customers by pairing the expertise in process design and engineering along with quality custom confectionery equipment based in the United States.
